

Amendments to the claims

1. (canceled) A topical analgesic, comprising, an effective amount of each of the following components: cornmint oil; orange oil; pennyroyal oil; rosemary Spanish oil; corianda oil; menthyl acetate; alpha pinene; beta pinene; camphor white oil; calendula oil; mineral oil; and almond oil.

2. (canceled) The topical analgesic of claim 1, wherein said effective amounts are about: 65-66% by weight cornmint, .4-1.0% by weight orange oil; 4.0-5.0% by weight pennyroyal oil; 6.0-7.0% by weight rosemary Spanish oil; .2-.4% by weight corianda oil; 1.0-2.0% by weight menthyl acetate; 1.0-2.0% by weight alpha pinene; .7-1.5% by weight beta pinene; 5.0-6.0% by weight camphor white oil; .04-.06% by weight calendula oil; .02-.03% by weight mineral oil; and 15.0-16.0% by weight almond oil.

3. (canceled) A topical analgesic comprising, an effective amount of each of the following components: cornmint oil, orange oil; pennyroyal oil; rosemary Spanish oil; corianda oil; menthyl acetate; alpha pinene; beta pinene; camphor white oil; calendula oil; and mineral oil.

4. (canceled) The topical analgesic of claim 3, wherein said effective amounts are about: 80-81% by weight cornmint oil, .4-1.0% by weight orange oil; 4.0-5.0% by weight pennyroyal oil; 6.0-7.0% by weight rosemary Spanish oil; .2-.4% by weight corianda oil; 1.0-2.0% by weight menthyl acetate; 1.0-2.0% by weight alpha pinene; .7-1.5% by weight beta pinene; 5.0-6.0% by weight camphor white oil; .04-.06% by weight calendula oil; and .02-.03% by weight mineral oil.

5. (canceled) A composition adapted to reduce pain associated with menstruation, comprising, an effective amount of each of the following components: cornmint oil; orange oil;

pennyroyal oil; rosemary Spanish oil; corianda oil; menthyl acetate; alpha pinene; beta pinene; camphor white oil; calendula oil; mineral oil; and almond oil.

6. (canceled) The composition of claim 5, wherein said effective amounts are about: 65-66% by weight cornmint, .4-1.0% by weight orange oil; 4.0-5.0% by weight pennyroyal oil; 6.0-7.0% by weight rosemary Spanish oil; .2-.4% by weight corianda oil; 1.0-2.0% by weight menthyl acetate; 1.0-2.0% by weight alpha pinene; .7-1.5% by weight beta pinene; 5.0-6.0% by weight camphor white oil; .04-.06% by weight calendula oil; .02-.03% by weight mineral oil; and 15.0-16.0% by weight almond oil.

7. (canceled) A composition adapted to reduce pain associated with menstruation, comprising, an effective amount of each of the following components: cornmint oil, orange oil; pennyroyal oil; rosemary Spanish oil; corianda oil; menthyl acetate; alpha pinene; beta pinene; camphor white oil; calendula oil; and mineral oil.

8. (canceled) The composition of claim 7, wherein said effective amounts are about: 80-81% by weight cornmint oil, .4-1.0% by weight orange oil; 4.0-5.0% by weight pennyroyal oil; 6.0-7.0% by weight rosemary Spanish oil; .2-.4% by weight corianda oil; 1.0-2.0% by weight menthyl acetate; 1.0-2.0% by weight alpha pinene; .7-1.5% by weight beta pinene; 5.0-6.0% by weight camphor white oil; .04-.06% by weight calendula oil; and .02-.03% by weight mineral oil.

9. (original) A composition adapted to reduce pain associated with menstruation, comprising, an effective amount of each of the following components: cornmint oil, orange oil; pennyroyal oil; rosemary Spanish oil; corianda oil; menthyl acetate; alpha pinene; beta pinene; camphor white oil; and calendula oil.

10. (original) The composition of claim 9, wherein said effective amounts are about:

80-81% by weight cornmint oil, .4–1.0% by weight orange oil; 4.0-5.0% by weight pennyroyal oil; 6.0-7.0% by weight rosemary Spanish oil; .2-.4% by weight corianda oil; 1.0-2.0% by weight menthyl acetate; 1.0-2.0% by weight alpha pinene; .7-1.5% by weight beta pinene; 5.0-6.0% by weight camphor white oil; and .04-.06% by weight calendula oil.
